ABSTRACTED-PUB-NO: JP2001005765A

BASIC-ABSTRACT:

NOVELTY - The real name representing several languages input to general web browser, is judged and transmitted to real name server. The database corresponding to user language included in real name, is searched to link web site having desired information with web browser. Similarly, process is repeated and desired information is provided to user, even if the database corresponding to user language is not found.

USE - For connecting web site and for providing information in connected web site to user using real name representing user's country language.

ADVANTAGE - Since the web site with desired information is connected to web browser using the real name representing user's country language, the desired information in web site is provided to the user, even if he does not know English domain name or Internet protocol address.
